Attn: Thinking Bigger Business Media

I have had the pleasure of working with Midwest Vascular Access for the last few years. This company is outstanding! I supervise an infusion center in the Shawnee Mission area and frequently use their services. In fact, they are the only company I use for long term vascular access placements. They are extremely dependable and always available. My patients have always received same day service. This company is staffed with reliable competent nurses. All of my patients come back to me with nothing but good things to say. I even have patients who request this company for repeat vascular access placements. This company is a small, well organized group that is well known in our community. I think highly of Michelle and her team. It is my pleasure to write this letter in honor of Midwest Vascular Access. If I can provide you with any other information, please feel free to contact me at 913-772-8630.

Sincerely,

A handwritten signature in black ink that reads 'Judi Holden RN'. The signature is written in a cursive style.
